ELLEN ENGLUND
ESTIMATOR/PROJECT MANAGER
YEARS EXPERIENCE: 3

INTRODUCTION

I have a Bachelor of Science in Civil Engineering with a minor in Municipal Engineering from Michigan Technological University. While I may have recently earned my degree I had the opportunity to participate in multiple internships where I gained experience with soils testing as well as commercial site design both in Detroit and the Metropolitan Area. I have an understanding of soils characteristics, some exposure to geomembrane materials and landfill estimates, exposure to underground utilities and small detentions systems, some knowledge on heavy hauls. Since working with Fisher Contracting I've worked on a variety of projects ranging from environmental restoration to building demolition. I've grown a lot in the past year and have developed significant client/owner communications skills and an array of construction experience and knowledge.
